20th October 2005

Hello. My name is Michael Johnson. And I am the General Manager of **Johnson Bros. Hardware - Mitre10.** Mona Vale & Avalon stores.

We recommend to all of our customers who purchase electric power tools from either of our stores. That they, can register their power tools & other valuable equipment with **Aust. Powertool Register™®**. On a secure database to record all of the relevant details. Such as the Make, Model & Serial numbers of the equipment that they have just purchased.

A number of these power tool purchases from our stores are to replace tools that had been stolen. And most of the trades people, even though they no the Make/Manufacturer of the tools that were stolen, have no idea of any of the relevant details (Model & Serial N^o's) of their power tools. This makes it difficult for them to notify their Insurers & the Police of the relevant details of the stolen equipment. And then, to be able to make a claim on there power tool Insurance.

Again, this is the reason that **Johnson Bros. Hardware - Mitre10.** Have no hesitation in recommending to all of our customers who purchase power tools. To register their power tools with. **Aust. Powertool Register™®**.

And we also believe that. **Aust. Powertool Register™®** is an inexpensive way for all trades people to keep track of all of their valuable power tools and other expensive equipment.

Michael Johnson
